Re: Amended Notice of Intention to Commence Small Mining Activities, Rainbow Project,
S/053/032, Washington County, Utah

Dear Mr. DeLong:

The Bureau of Land Management has forwarded a copy of your latest (June 1995) amended notice to our office. The amended notice involves your Rainbows End small mining project, located on BLM managed land in Sections 23, 26, and 27, T39S, R18W, SLBM, Washington County, Utah. Please accept our apology for the unforeseen delay in forwarding our response to your notice.

The amended notice summarizes your plans to install a small pilot mill within the existing mine site area. Your notice contains a listing of the planned facilities/equipment and states that no new ground disturbance will result from the installation of this pilot mill. The amended notice satisfies the notice requirements of Rule R647-3 of the Utah Mined Land Reclamation Act of 1975, Title 40-8, et seq., Utah Code Annotated.

As you may recall, the Division sent a July 15, 1994 letter to you (copy enclosed), in response to our receipt of another amended BLM notice for this project, dated May 13, 1994. Enclosed with our July 15, 1994 letter, was a Notice of Intention to Commence Small Mining Operations application form (FORM MR-SMO). Because your May 13, 1994, (and your June 1995) amended notice, involve mining related activities that are considered beyond the scope of your original exploration notice for this project, we informed you that this project site would now fall under a small mining category. Accordingly, we requested that you please fill out and file with our office, a Notice of Intention to Commence Small Mining Operations application form. Our file records indicate that we still have not received the completed small mining operations application from you. For your convenience, we have enclosed another copy of this form, and a photocopy of a 7.5 minute USGS topographic quadrangle map of the site location. Please complete and return the form and show the location of all mining-related disturbances, onsite facilities, and access roads associated with this mining operation. If you have questions about completing this form, please call me or any of the Minerals staff at (801) 538-5340.

Steven W. DeLong

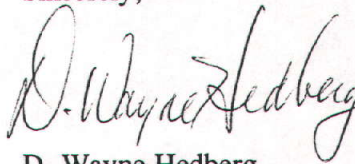

S/053/032

October 20, 1995

By letter dated, February 8, 1995 (copy enclosed), we forwarded an annual report form to you for the 1994 year. State mining statute and rules require all permitted mining operations to file this report regardless of annual mine activity, unless the operator receives a written waiver from the Division. Our records indicate we have not yet received your completed 1994 annual report form. We have enclosed another copy of this form and request that you complete it and return it along with your completed form MR-SMO.

Thank you for your cooperation and prompt attention to these permitting concerns. We need this information to have a complete file record for your mining operation. Please reference our designated file number S/053/032 when forwarding additional information or correspondence on this project to us.

Sincerely,

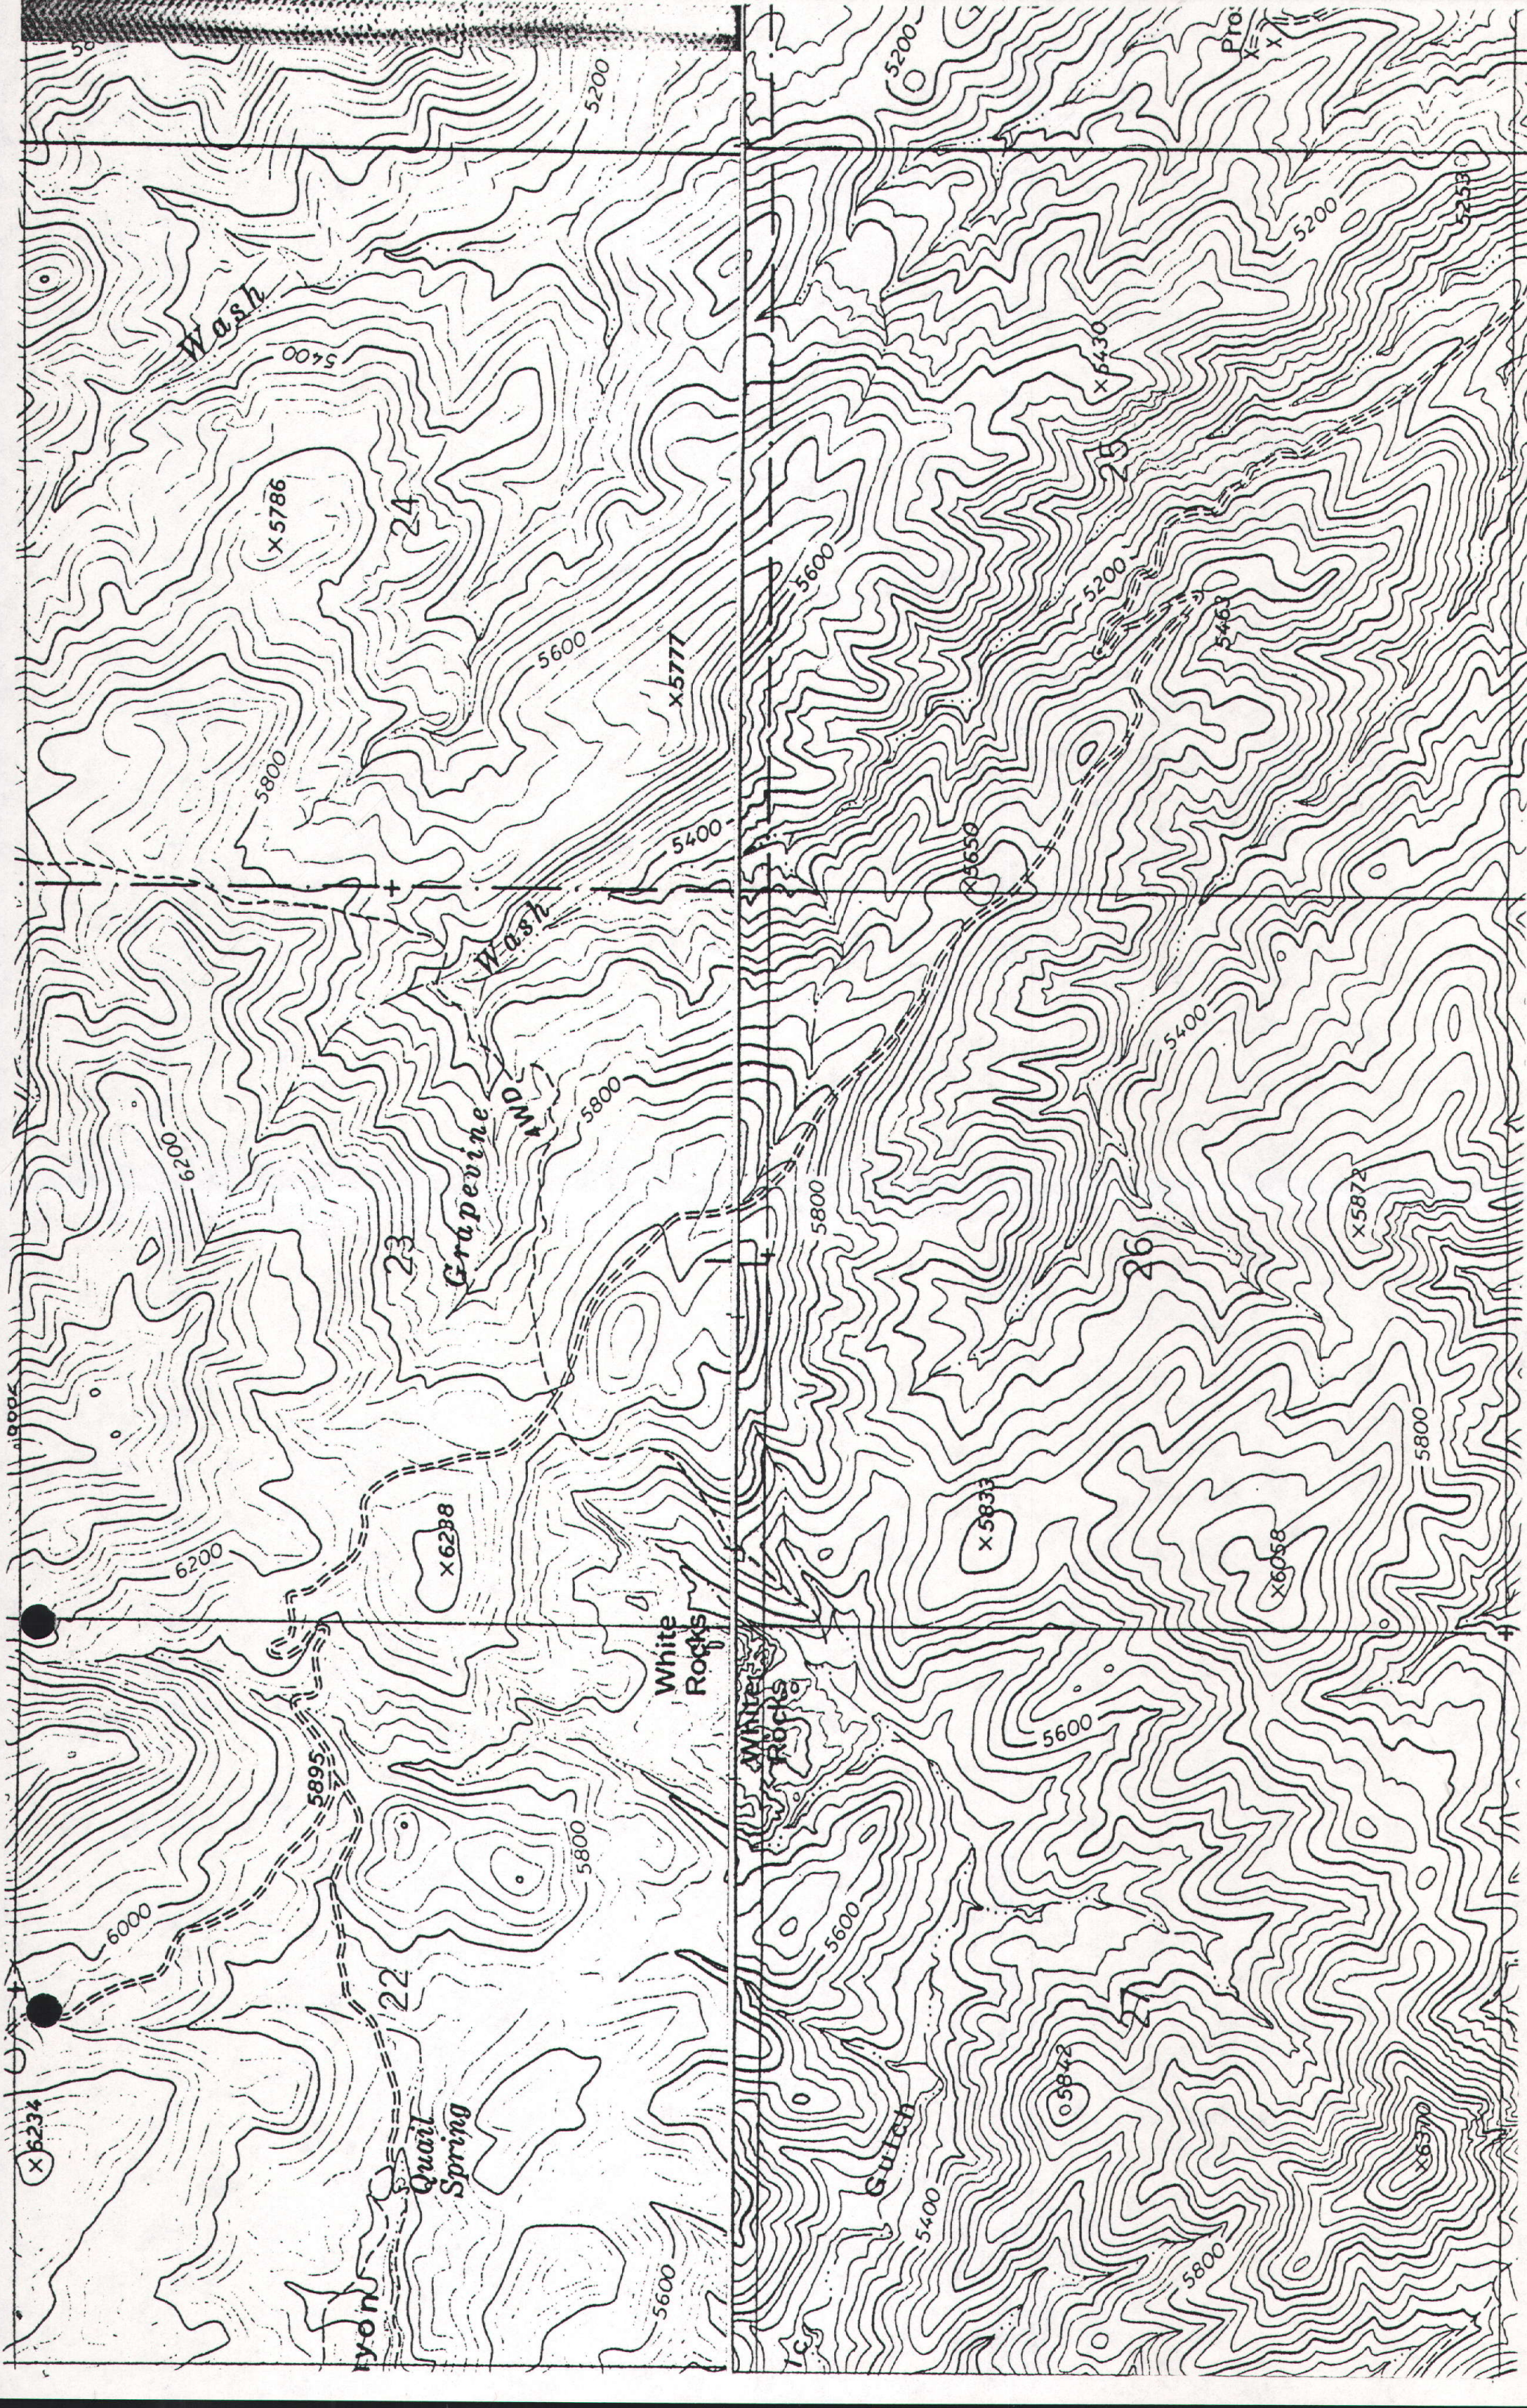

D. Wayne Hedberg
Permit Supervisor
Minerals Regulatory Program
